Sustainability is a hot topic at the moment: The special supplement "Grüne Finanzierung & Nachhaltige Kapitalanlage" (Green Financing & Sustainable Investment) aims to provide a comprehensive overview of the role that ESG factors (environmental, social, governance) are now playing in the world of companies and institutional investors. In this newly published supplement, experts give valuable advice on how finance departments can best incorporate the topic

of sustainability into their own work – from financing through financial investment right up to reporting obligations. Finance executives receive practical tips and the most important information on all aspects of regulatory developments.

The special supplement with a circulation of approx. 34,000 will be published not only in the 5/2021 issue of FINANCE, but also in its prestigious affiliate media DerTreasurer 3/2021 and dpn 5/2021.
